🎓 EDUCATION

Bachelor of Engineering (B.Eng.), Mechatronics

Federal University of Technology Minna

2021 - 2026 | Graduated

🧠 SKILLS

Machine Learning & Deep Learning

Python, TensorFlow, PyTorch, scikit-learn;
Random Forests, CNNs, LSTMs, Transformers

Computer Vision & NLP

MobileNetV2, YOLOv8, OpenCV, MediaPipe;
transfer learning, text classification, LLM tool
calling

Model Development & Evaluation

Data preparation, feature engineering, baseline
comparisons, ROC-AUC, precision/recall,
validation splits

Inference & Deployment

TensorFlow Lite, model quantization,
Transformers.js, ONNX / WebAssembly, browser
and edge inference

Backend & Engineering

FastAPI, Flask, REST APIs, Firebase / Firestore,
AWS, Git, Linux, C++, React Native

📄 PROFILE / SUMMARY

AI/ML engineer and mechatronics graduate building computer vision, NLP and speech applications. Hands-on experience preparing data, training and evaluating models, and integrating inference into mobile, browser and backend systems. Combines model development with API engineering and embedded-system experience.

💼 PROFESSIONAL EXPERIENCE

ToksAfrica

Machine Learning & Backend Intern

Jul 2025 - Jan 2026 | Remote

- Worked on audio transcription optimization and ML-backed application services.
- Built Flask APIs and Firestore attendance workflows; integrated device data through an AWS EC2 service.

📁 PROJECTS

GrainGuard | Multimodal ML

- Developed Random Forest infestation detection and MobileNetV2 grain-image classification, combining model outputs with environmental data in a React Native app.
- Vibrational classifier achieved approximately 0.80 ROC-AUC on the project evaluation.

JAI | LLM Business Agent

- Built a FastAPI / Next.js MVP connecting WhatsApp to an LLM tool-calling agent for catalogue, order and payment workflows, with Paystack verification.

Jconvert | On-Device Speech Recognition

- Integrated browser speech inference using Transformers.js and ONNX / WebAssembly; processed overlapping 30-second audio windows and merged transcript fragments.

NeuroFocus | Computer Vision

- Combined YOLOv8 phone detection and MediaPipe facial landmarks with calibration and distraction-state logic in an Electron desktop prototype.

SkimLit | NLP Classification

- Implemented token, character and positional representations for PubMed abstract sentence classification; recorded 83.26% validation accuracy versus a 72.18% baseline in a course-based experiment.
